Filamat Launches new line of FRP tanks, pipes and ducts

Today, Filamat launched its new FRP product line, *Filamaster*. The *Filamaster* product line includes a full range of ducts, tanks and pipes, all made of corrosion-resistant materials with the same quality-assurance guarantee that comes with all Filamat products. Standard *Filamaster* products can be ordered in a wide variety of standard sizes and shapes as well as custom shapes and sizes.

Filamaster vertical tanks come in capacities from 1,300 to over 30,000 US gallons. The round duct and pipe series are available from 2 to 60 inches in diameter. A full set of connections can also be added including bell ends, field kits, flanges, gaskets and elbows. The pipe and duct can be built for both high temperature and caustic applications.

Every *Filamaster* product undergoes rigorous quality assurance tests. A list of ASTM test methods is available for the products.

The new product line is produced in Filamat's 50,000 square-foot manufacturing plant in Ontario, Canada, conveniently located close to major North American highways as well as key transportation hubs.

The *Filamaster* line is now available through a growing network of independent service representatives. Please contact Filamat for the rep nearest you.

About Filamat

Filamat Composites Inc. is an ISO 9001-2000 certified original equipment manufacturer of fiber reinforced plastic products (FRP). Serving clients across North America, Filamat is an industry leader in FRP design, engineering, prototyping, development and manufacturing. Visit www.filamat.com.
